Member support. A topic of significant interest to the CSCW, IT and IS communities is the issue of how software and other technical systems come to be adopted and used.

It is plausible that these efforts will converge again as social media move in

This list only contains papers published in one conference; papers published at other venues have also had significant impact on the CSCW community. Whereas much North American involvement was initially from commercial software developers and telecommunications companies, Europe drew mainly from government and academic research focused on large enterprises that at that time typically designed and developed software in-house. It is plausible that these efforts will converge again as social media move into widespread use in a broad range of organizations.

Presence as Influencing Factor for Social Capital In Proceedings. As technology is used to support more of our activities in ever finer granularity, changing those activities as it does, there is a tremendous need for – and benefit in – understanding the changes around us, some of them broad and others domain-specific.
